DETAILED ACTION

1. The previous requirement for restriction is vacated in response to Applicant's suggestion that the claims be grouped differently. A new requirement for restriction is established in the instant Office Action.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 6-11, 21, 23-24, 26-64, and 66-67, drawn to a system, apparatus, and method for querying a database server from a first computer to determine the status and identifier associated with a second computer within the operating network for establishing a connection, classified in class 395, subclass 200.58.
 - II. Claims 12-16, 19-20, 22, 25, and 68, drawn to a system, apparatus, and method for directing an electronic mail message from a first computer through a network to a second computer for initiating the second computer to directly message the first computer with its address, classified in class 395, subclass 200.37.
 - III. Claims 17-18, drawn to an apparatus for initiating an electronic mail transmission, classified in class 395, subclass 300.36.
 - IV. Claim 65, drawn to a method for updating and querying a status database server, classified in class 395, subclass 200.54.
3. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single

combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as allowing a communicating computer to establish the identifier and online status of a second computer with identifying itself to the second computer to accomodate privacy concerns; invention II has separate utility such as allowing a called computer to determine the sender of a connection request and directly respond or refuse a connection with the calling computer; invention III has separate utility such as preparing a mail message for electronic transmission to a distribution mail server; and invention IV has separate utility such as monitoring status of computers on a network system to enable management of a network system. See MPEP § 806.05(d).

MR 1/2/98

4. Claim 5^{and 25} link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 5. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 2756

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for each of Groups I-IV is not required for each of the other Groups, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. The Examiner notes that although an election was made in the previous requirement for restriction, that the previous requirement has been vacated in order to regroup the invention as suggested by Applicant. Thus, a new election must be made in order to maintain clarity in the record.
